Achievement

Crop Deal

Completed case study on **CropDeal** which is a web based system where dealers can easily deal with the farmers for the crops(fruits/vegetables) they want. In short the app acts as a bridge between the Farmers and Dealers. Whenever farmer want to sell the vegetables/fruits at the Farm itself, he just wants to select the type of Crop, quantity available and publish the information to Dealers. Whoever(Dealer) is interested in purchasing will connect with the Farmer, will reach the location, checks the quality of the crop, negotiates the price, weighs the crop and payment will be done to the farmer from the App itself which will be more transparent rather than paying tolls/commissions.
